```

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999) and the number of people in the private sector has increased by 1.5 million (from 2.5 million in 1980 to 4 million in 1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the quality of care in the public sector. This has led to a number of initiatives, including the introduction of the National Patient Safety Agency (NPSA) in 1999, the establishment of the National Clinical Audit Programme in 1999, and the introduction of the National Framework for NHS Staffing Levels in 2001. These initiatives are aimed at improving the quality of care and ensuring that patients receive the best possible care.

The NPSA is a non-departmental public body that was established in 1999. Its main role is to monitor and improve the safety of NHS services. It does this by conducting investigations into serious incidents, promoting best practice, and providing advice and support to NHS organisations. The NPSA also publishes reports on its findings and recommendations.

The National Clinical Audit Programme is a programme of clinical audits that was established in 1999. Its main role is to improve the quality of care by identifying areas for improvement and implementing changes. The programme covers a wide range of clinical areas, including general practice, hospital inpatient care, and community care.

The National Framework for NHS Staffing Levels was introduced in 2001. It sets out the minimum staffing levels that should be maintained in NHS services. The framework is based on the principle that staffing levels should be sufficient to ensure that patients receive the best possible care. The framework also sets out the minimum standards for the training and experience of staff.

These initiatives are part of a wider effort to improve the quality of care in the public sector. They are aimed at ensuring that patients receive the best possible care and that the NHS is able to meet the needs of the population. The initiatives are also aimed at improving the efficiency of the NHS and reducing costs.

The initiatives are part of a wider effort to improve the quality of care in the public sector. They are aimed at ensuring that patients receive the best possible care and that the NHS is able to meet the needs of the population. The initiatives are also aimed at improving the efficiency of the NHS and reducing costs.
